

Wakeboard Rack Kit

Universal wakeboard rack kit fits most manufacturer's towers with horizontal mounting bars. Made from polished aluminum for supreme weather resistance and covered with vinyl sleeves for ultimate board protection.

- Holds 2 wakeboards or skis
- Fits round tubing 1-1/2" to 2" outside diameter
- Kit includes 2 sets of brackets, screws and bungee cord
- Horizontal bar is NOT included

Part No. 9750

Part No. 9590

Universal Tower Speakers

Polk/MOMO coaxial and 3-way loud speakers are actually "integrated component systems" letting you put component system sound quality into spaces where components just won't fit. They feature a beefy external crossover instead of a little compacitor stuck to the tweeter post. Stands up to moisture, sunlight and extreme temperatures.

- Top quality 3-way 300watt
- Lightweight- only 11 pounds each
- Universal mount- will fit on virtually any wakeboard tower with 1-1/2" to 2-1/2" tubing.
- Virtually indestructible- these speakers are encased in a tough poly housing with UV inhibitors to protect against fading.
